MICROLEARNING

WHAT IS MICROLEARNING?

Aspire's Microlearning resources are interactive, video-based learning modules designed to engage learners by showing realistic workplace situations.

Learners can work through the modules at their own pace, whether they're in a classroom or workplace learning environment.

Each Microlearning module includes:

- Practical demonstrations of realistic workplace situations
- Scenario-based learning activities that allow learners test their comprehension
- Current workplace practitioners talking about their day-to-day work experiences
- A Training Guide that shows trainers how to incorporate the Microlearning modules into their training strategy.
